

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country excursion in their RV. Newly retired, after spending many years working with his brother to develop their crane business into an market leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road trip.

All through their trip, John reacquainted himself with previous business connections along the way. In combination with these conversations and a significant event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a substantial marketplace for a product that could swiftly and safely lift people in the air to accomplish upkeep and other building functions.

Upon returning from their travels, John established a joint venture with two friends and purchased a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty workers, they manufactured and sold the first JLG aerial work platform. The business incorporates many of the basic design essentials of that original lift into current models.

JLG forklifts have come a ways since Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. These days, the business proudly continues to expand itself into different markets globally and develops new products to ensure customers are capable of being more efficient and perform in the workplace within a safer environment.
