

## Doosan Forklift Part

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international and intercontinental organization which includes Defense Industry Products, Industrial Vehicles, Diesel Engines, Automation Systems, Machine Tools and Construction Equipment.

In the United States, Doosan Infracore America Corporation is headquartered in Suwanee, Georgia. It is home to a 170,000 square foot manufacturing facility, which is the home of the Compact Equipment and Construction division. West Caldwell, New Jersey is home to the Machine Tool division and Cleveland, Dallas is home to the Forklift division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction consumer needs.

There are well over 220 Doosan service and sales locations operating in Canada and the United States. Furthermore, there are more than 90 independent dealers moving forklift supplies and materials handling equipment. This system allows Doosan Infracore America to aggressively compete in this competitive marketplace. The forklift product line remarkably includes 63 different models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these numerous truck versions range from 3,000 to 33,000 lbs. All trucks are designed in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest developing forklift and lift truck corporation in the North American marketplace, due to its exceptional level of product performance and their consistently high level of client support and service given to all Doosan Infracore Forklift clients. The U.S. forklift division situated in Cleveland has a professional team experienced in Sales, Purchasing, Marketing, Logistical and Technical Support.

At first the home-based forklift market in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled lift trucks as part of a home-based equipment expansion project. Sales of these products were initially targeted to state-run corporations, large scale businesses, and the military. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical training became the new focus for enhancing quality and product development.

Domestic lift truck trade for Daewoo started in 1967 and grew to an astonishing 90% market share in Korea. By the 1980's, Daewoo's superior technological improvements combined with sales success placed them in a position of significant expansion of their lift truck business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative venture project to respond to competitive pressures in the US materials handling market. This project radically expanded Daewoo's lift truck sales. Construction was finished in 1984 to facilitate a new plant which helped establish the company for the fabrication of high end added-value products suited for export. In 1993, the company had a global sales system and started exporting versions they had developed through in-house expertise, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into overseas markets.
